

# INI-LEV-PURE

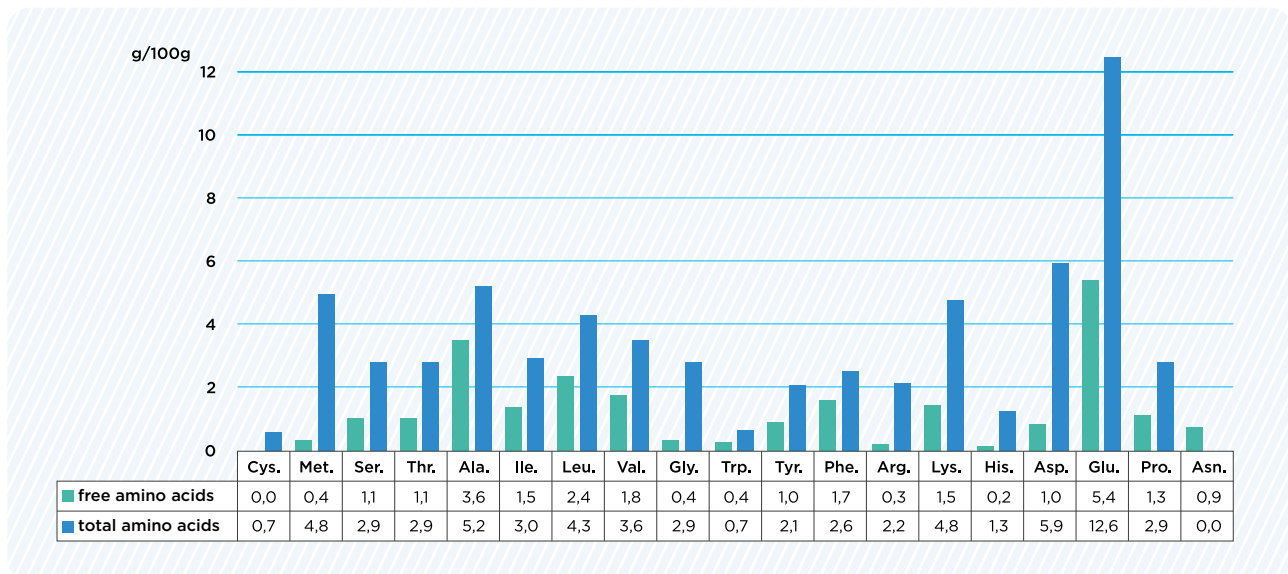

**INI-LEV-PURE** is a **100% organic product** that originates from a mixture of yeast extracts. It contains a **rich and defined compositional mixture of amino acids, peptides and cofactors, macronutrients and micronutrients (mg, P, K, etc.)**, in addition to containing inorganic nourishment, that help to better enzymatic transcription of the yeasts for metabolism and optimal and new cell generation.

**INI-LEV-PURE** is the ideal candidate not only for obtaining well-formed new cell generation, but also thanks to its amino acid rich composition, it **enhances the aromatic profile. It also provides prevention in the formation of reductions.**

**INI-LEV-PURE** increases **NFA 23mg/l** (at a dose of 20g/Hl) and contains **14.6% protein.**

## Application:

- In exponential or tumultuous phase. When we have a falls in density as small as (-5 or 10) with regard to the initial density. **INI-LEV-PURE** prevents and feeds yeasts to avoid ammonia shortages early reductions that can condition metabolic stress and cause difficult endings and/or stuck fermentations. Dose in this phase: 20 g/Hl.

## Characteristics:

Beige powder.

## Method of use:

Mix with must at a ratio of 10 times the weight of **INI-LEV-PURE** and add to the fermentation tank.

## Preservation:

Store in a dark, dry place, free from odours.
